SKILLS

React, JavaScript, Python, Flask, SQLAlchemy, Sequelize, Postgres, Redux, TDD, HTML5, CSS3, SQL, Git, Nodejs, Express, Pug

PROJECTS

Cubeagram *Instagram clone* (JavaScript, Python, SQLAlchemy, Flask, React, Redux, HTML5, CSS3) [Live Site](#) | [GitHub](#)

- Implemented controlled input previews on posts so that a user can visualize what their post looks like to ensure it's to their liking before submitting their post.
- Designed a Modal for editing comments to negate a redirect to another page for better user experience.
- Used local storage and optional chaining to keep state when a user refreshes any page they're on.

Whelp *Yelp clone* (JavaScript, Python, SQLAlchemy, Flask, React, Redux, HTML5, CSS3) [Live Site](#) | [GitHub](#)

- Utilized Google's API to fetch and render data to make an interactive user interface.
- Created a responsive design for multiple different viewport sizes to account for any device.
- Implemented a robust search feature using several query functions to allow a user to search for almost any piece of information in any given business.

CabinGo *Airbnb clone* (JavaScript, React, Redux, HTML5, CSS3, Express, PostgreSQL) [Live Site](#) | [GitHub](#)

- Used React and ES6 practices to implement a single-page interactive and intuitive experience.
- Rendered Amenities using optional chaining and nested ternaries to appropriately display the users input.
- Built out numerous React Components including custom forms and content display pages with JSX.

Carra *Quora clone* (JavaScript, Express, HTML5, CSS3, Pug, SQL) [Live Site](#) | [GitHub](#)

- Implemented nested elements to allow users to post questions, answers, and comments through the use of join table query searches and data manipulation in pug to ensure data integrity.
- Implemented session authentication to check permissions when enabling edit and delete features. All delete buttons were dynamic allowing users to delete questions without the need to reload with the use of an event listener.
- Created custom buttons with effects that react to mouse hovers to enhance intuitive use.

EXPERIENCE

Technician | 4-way Pest Control - Idabel, OK Jan 2019 – Feb 2019

- Assessed and identified infested residential locations and developed all treatment and control plans.
- Maintained and updated customer and task records on a daily basis.
- Applied chemical solvents to furniture and home interiors.

Insurance Agent | Aflac - Durant, OK Jan 2019 – Feb 2019

- Educated customers about different types of insurance coverage and made recommendations
- Evaluated insurance policies and recommended additional coverage and networked with potential customers.
- Confidentially maintained all customer insurance documents.

EDUCATION

App Academy | Full Stack Web Development Aug 2021 - Mar 2022

Relevant Coursework includes: JavaScript, React, SQL, Python, Flask, Express

Eastern Oklahoma State College Aug 2017 - Jan 2019

Studied Agricultural Sciences
